

Services : On-site & In-situ refurbishment

Team expertise:

The DMM team have developed specialised skills supported by custom built mobile equipment that enables them to complete complex refurbishment projects, safely and on-time. The ability to work on heavy equipment while it is still in the field, for example at the coal mine operating slope or deep in the forestry harvest areas, delivers massive savings to plant operators by greatly reducing the down time of their equipment and their work force.

DMM have built an impressive list of case histories where onsite and in-situ maintenance tasks have saved operators hundreds of thousands of dollars in down time costs, examples include ;

- Rapid response to emergency breakdown repairs
- Coal dredge bucket bracket line boring
- Attachment repairs in forestry areas
- Paper machine repairs
- Quarrying and crushing plant repairs
- Sand mining processing equipment repairs
- Food processing equipment repairs
